

ECO-therm Laboratory Thermometers

The **Brannan ECO-therm** Laboratory Thermometers are green spirit thermometers filled with a non toxic expansion liquid. The thermometers are currently available to cover the four most popular temperature ranges although it is intended to add further ranges in future. The quality and resolution make these an ideal substitute for general purpose mercury thermometers.

Each thermometer is fitted with a Brannan non roll end cap which has an integral ring to allow the thermometer to be suspended and is supplied in protective PVC packaging.
